Exercise on NodeJS Fundamentals

1. Write a Node Snippet to display the current day and time on Node Engine With Your Name Concatenated With a Welcome Message.

2. Write a Node Snippet to find 1st January is being a Sunday between 2014 and 2050.

3. Write a Node Snippet to convert temperatures to and from Celsius, Fahrenheit.
   [Formula : c/5 = (f-32)/9 [where c = temperature in Celsius and f = temperature in Fahrenheit]
   Expected Output :
   60°C is 140 °F
   45°F is 7.222222222222222°C

4. Write a Node Snippet to check two given numbers and return true if one of the number is 50 or if their sum is 50.

5. Write a Node Snippet to create new string with first 3 characters are in lower case from a given string. If the string length is less than 3 convert all the characters in upper case.
